

WIA1005 Lab Task 2 Dual Stack IPv4 and IPv6 (Week 6 – 5%)

Duration : 1.5 hours

In this activity, you need to configure all the devices and verify the network connectivity.

IP Addressing Information

Network ID	IPv4 Network Address	IPv6 Network Address
N1	172.20.X.0/26	2001:X:X:1::/64
N2	172.20.X.64/27	2001:X:X:2::/64
N3	172.20.X.96/28	2001:X:X:3::/64

X is your Rack number, if you are Rack-8, X=8

IPv4

- Assign first host to the PC, second host to the Switch and last host to the Router.

IPv6

- Assign interface ID ::100 to the Router, ::200 to the Switch and ::X to the PC. X is your Rack number.
- Ensure all devices can ping each other.
- Ensure all group members understand the configuration tasks.
